Up to sixteen RS422 Controlled PTZs' data wire can be connected in a star configuration (home-runned) to one DX8000 series DVR when using Pelco's CM9760-CDU-T, Code Distribution Unit. Without the CM9760-CDU-T, the data wire would have to be daisy-chained from one dome to the next dome; conversely, the coax cable from each camera would still need to be brought back to the DX8000. Depending on the location of the PTZ cameras, the CM9760-CDU-T can be a huge labor cost savings.

Note: The above drawing is meant to be used as a sales guide. Exact wiring connections, proper cable and other necessary equipment needs to be reviewed and determined by installing party. KPA, Inc. assumes no liability.
