****Fifteen more Spectra PTZs can be added to this system because the CM9760-CDU-T allows for sixteen domes to be home-runned back to the head-end. The CM9760-CDU-T is not required if home-running of the data wires is not necessary. Coaxitron control is available directly from the DX8000. ****

**** Note: Exact wireless components and connections need to be confirmed by the wireless manufacturer. ****

**** KBD300A is an option for those that want a joystick controller. PTZ control is available through the GUI of the DX8000's software. ****

Note: The above drawing is meant to be used as a sales guide. Exact wiring connections, proper cable and other necessary equipment needs to be reviewed and determined by installing party. KPA, Inc. assumes no liability.
